

**O rit Rish pi Lavi**

**General Background :**

Self-employed and working for chosen organizations, I chose to lead and run an interdisciplinary career, moving from Education Management to the academic world, business world, public policy and local politics, legislation, expertise in models of Local Governance and public work in the area of Equal Opportunities, Gender Mainstreaming and more.

I see myself as a permanent learner and teacher, a leader out of responsibility and understanding of community roles, state roles, and alot of interest in localization and globalization processes. Academic research and excellence has always been an important part of my being. Also, the israeli local systems are in a great need for reform, and I want to be part of a good reform that can take place and will hopefully happen.

There are several interest areas in City Management, Urban issues, issues between the business world and the public world that I have great interest to explore.

Methodolgy I would choose will be the one best suited for the research that will be decided upon. I keep updated with current methodologies for academic research and believe a quality research will be carried out.
