About me

My name is: Abdallah Asli, lives in Arraba city in the north of Israel. I worked for 17 years as a math teacher in a high school, from 2015 until today I am a school principal. I have a bachelor's degree in mathematics, I have two master's degrees, one in mathematics education/teaching mathematics and the other in management and leadership in education. I loved my job with all my heart in the field of teaching. Mathematical research and discovery for me is a hobby and this is what motivated me to study and teach mathematics, to continue my studies for advanced academic degrees, to discover, investigate and handle various mathematical and scientific issues and problems. My hobby of research was my main reason to study for a PhD.
